Leader in Connector and EMC Products & Solutions

Founded in 1979, Power Dynamics, Inc. is a global connector leader offering a comprehensive range of products that are designed and manufactured to meet or exceed Original Equipment Manufacturers specifications worldwide. Our extensive offering makes it easy for customers to reduce sources of supply while taking advantage of competitive market pricing.

Serving the Electronics and Industrial Markets

Power Dynamics serves many markets including medical, power distribution, instrumentation, peripheral, data communications, business equipment, agriculture, food processing and many more.

Global Sales & Distribution Network

Power Dynamics supports its customers through a global network of factory trained engineers, local manufacturers' representatives and authorized stocking distributors and wholesalers.

Samples & Specifications

Requests for samples of most catalog items are available for evaluation, Free of Charge, and can be requested through any of our representatives or distributors and online at powerdynamics.com. Detailed specifications for all products can be viewed online.

Engineering Services

Power Dynamics offers advanced engineering, CAD, EMC and expert tooling capabilities to create, modify or customize most products to meet specific customer requirements. In most cases our design group can take a project from concept to prototype within a matter of weeks.

Quality Control

In compliance with ISO 9001, All Power Dynamics quality control procedures are documented and available for review.

Safety Agencies

All Power Dynamics' components are designed, manufactured and tested in compliance with the standards and requirements of international safety testing agencies. Products offered in our catalog are certified as required by the appropriate international safety testing agency. Safety agency certification reports are on file at Power Dynamics. Copies are available upon request.
